

WE CANNOT PREDICT THE FUTURE.

But we can actively shape it.

That's why we at the BODE Group are already developing the standard for innovative door systems in all mobility sectors for tomorrow. This is what our teams at our locations around the world stand for. We are united by the same vision: access to mobility for all. This is now reflected in our joint corporate brand: BODE - Access to mobility

BODE – Access to mobility

Our daily aspiration is to play a central role in the mobility transition. We also want more and more people to have access to mobility. Our employees in the BODE Group develop and create door systems for modern rail vehicles and sustainable public transport. Regardless of how the traffic of the future is shaped: BODE has the right system that will accompany you for a lifetime thanks to our service. Barrier-free, innovative and sustainable.

Experience, innovation, foresight

As the BODE Group, we can look back on over 50 years of development experience. Today, locations in Germany, Poland, the USA, Switzerland, the UK, South Korea and Turkey belong to the corporate family. Our teams have always stood for safe and high-quality products. Today, we work together to boldly implement visionary development projects. Thinking ahead together with colleagues and customers and implementing the goal of the mobility revolution on a daily basis. Because this is how we create the future as we imagine it - efficient, visionary and accessible for everyone.

You can't get past BODE

It is clear on the market that BODE is the driving force when it comes to clear and forward-looking systems. This, and our clear orientation, makes it important for us to develop the new BODE brand. In future, we will also clearly distinguish the brand in its visual appearance to the outside world. The new corporate design appears in bright shades of blue and bright yellow-green. A unique design in the industry, in line with the corporate vision.
